

Project Design Phase-II

Data Flow Diagram & User Stories

Date	August 2026
Project Name	ServiceNow-Based Employee Laptop Request Application

Data Flow Diagrams:

The DFD below shows how laptop request information enters the ServiceNow system, is validated and stored, is routed for manager approval, and results in a status update and notification.

User Stories

User stories for the employee laptop request product are aligned to the functional requirements above.

Employee	Laptop Request	USN-1	As an employee, I can submit a laptop request with the required details.	Request is created with requester, manager, type and reason.	High	Sprint-1
Employee	Request Validation	USN-2	As an employee, I can be prevented from submitting a duplicate laptop request in the same year.	Existing current-year request is detected and duplicate creation is blocked.	High	Sprint-1
Manager	Manager Approval	USN-3	As a manager, I can review and approve or reject a laptop request.	Approval decision updates the request workflow status.	High	Sprint-1
Employee	Request Status	USN-4	As an employee, I can see whether my request is pending, approved or rejected.	Request displays the current workflow status.	High	Sprint-1
Employee / Manager	Notifications	USN-5	As a user, I receive an email notification when an approval decision is made.	Relevant user receives approval or rejection notification.	Medium	Sprint-2
Administrator	Role-Based Access	USN-6	As an administrator, I can control employee and manager access to request records.	ACLs allow only authorized operations and records.	High	Sprint-1
