

Problem-Solution fit canvas 2.0

Purpose / Vision: Centralized, secure and trackable employee laptop requests through ServiceNow

1. CUSTOMER SEGMENT(S) <i>Who is your customer?</i> Employees who need a company laptop. Managers who approve laptop requests. IT administrators who manage the request process.	6. CUSTOMER CONSTRAINTS <i>What constraints prevent action or limit choices?</i> Approval policy must be followed. Duplicate requests in the same year should be prevented. Access must be controlled through roles and ACLs.	5. AVAILABLE SOLUTIONS <i>Which solutions are available when the problem occurs?</i> Manual email requests, verbal requests and informal follow-up with managers/IT. A centralized ServiceNow request form provides a structured alternative.
2. JOBS-TO-BE-DONE / PROBLEMS <i>Which jobs-to-be-done or problems do you address?</i> Submit a laptop request with correct information. Specify Basic or Advance laptop type and reason. Obtain manager approval. Track status without repeated manual follow-up.	9. PROBLEM ROOT CAUSE <i>What is the real reason this problem exists?</i> The organization needs a standardized end-to-end workflow for request capture, policy validation, approval, status tracking and communication instead of scattered manual requests.	7. BEHAVIOUR <i>What does your customer do to address the problem?</i> Employees open the ServiceNow request form and enter details. Managers review and approve/reject. IT/admin users manage records and access controls.
3. TRIGGERS <i>What triggers customers to act?</i> New laptop requirement. Laptop replacement requirement. Need for an Advance laptop based on work requirements. 4. EMOTIONS: BEFORE / AFTER Before: uncertainty, repeated follow-up and lack of visibility. After: clearer process, transparent status and a predictable approval path.	10. YOUR SOLUTION <i>What solution fits the customer limitations and solves the problem?</i> ServiceNow-Based Employee Laptop Request Application using a Record Producer, custom request table, Business Rule for yearly duplicate prevention, Flow Designer approval, notifications, roles and ACLs.	8. CHANNELS OF BEHAVIOUR <i>What online and offline actions do customers take?</i> 8.1 ONLINE ServiceNow Service Portal / Service Catalog, Record Producer, request status and notifications. 8.2 OFFLINE Employee-manager communication and IT support discussions when clarification is required.
